POLICY # 0.2
EDUCATIONAL PHILOSOPHY

We believe that the Eufaula Public School System should provide quality educational experiences for all students of our school district. These experiences should prepare students for productive and fulfilling lives through optimal intellectual, social, and personal development. We recognize that education is not the exclusive responsibility of the public school but functions most effectively when joined with the home and the community. Our ultimate goal is to develop responsible citizens who reach their potential in a changing society.

To reach their full personal potential by:

- Experiencing and enjoying different forms of creative expression
- Learning about career opportunities and developing a positive attitude toward work
- Learning aout physical well-being and recreational activities
- Accepting responsibility for one's own decisions
- Developing a positive self-concept.
