

POLICY # 1.43

SELLING, MERCHANDISING, SUPPLEMENTAL OCCUPATIONS

The selling or merchandising of materials used in the educational program by our local employees within the School District may create problems for the employee and prove embarrassing to the Board of Education and the school system. Such merchandising or selling should be engaged in judiciously, if at all, with the full understanding that the best interests of the school system will take precedence in any interpretation of this policy.

Supplemental occupations, if engaged in by school employees, must not encroach upon the time the employee owes to the school system.
